MongoDB

👤 INTRODUCTION

Hello, I'm Darko! I'm passionate about software development and I'm skilled in HTML, CSS, JavaScript, and React. Lately, I've discovered my passion for the world of web development and the beauty behind building useful websites like the one you will find in my portfolio. I'm now looking for a junior web developer position to finally kick start my career and learn among professionals

📁 PROJECTS

myFlix App - React

A movie application built using the MERN stack (MongoDB, Express, React, and NodeJS). Back-end set up with a fresh REST API. Front-end designed as a single page client application with some use of React-Bootstrap.

Meet App

A serverless, progressive web application (PWA) built with React. The application is developed with the use of test-driven development (TDD). It fetches calendar events from the Google Calendar API.

Pokédex

A web application showing data from an external API. Built with HTML, CSS and JavaScript/jQuery.

myFlix - Angular

Angular client-side for the movie application myFlix. Built using the previously created server-side code (REST API and database).

🎓 EDUCATION

📍 **Computing and Control Engineering, University of Novi Sad Faculty of Technical Sciences**

⚙️ COURSES

- **Full-Stack Web Development Program , CareerFoundry**

★ EXPERIENCE

Having 10+ years of customer service and management experience in a high-end establishment of NYC hospitality allowed me to easily communicate with clients, establish requirements, and complete tasks.

- Greet and welcome all guest with a smile and professional conversation
- Provide genuine hospitality and teamwork on an ongoing basis.
- Give personal attention, take personal responsibility, and use teamwork when providing guest service.
- Establish excellent Selling skill
- Provide new hire customer management training when requested.
- Work with the managers to resolve guest complaint on time.
